VICTORIA COACH STATION

CLIENT: *Transport for London*
TYPE: *Coach Station*
DATE: *1991*

A.J WELLS
ARCHITECTURAL ENAMEL

London Victoria Coach Station is the largest, most significant coach station in London. It serves as a departure and arrival port for long distance coach services throughout the UK and is one of the busiest transport hubs in the country with over 10 million passengers passing through each year.

A.J Wells fabricated and enamelled the steel cladding and column casings back in 1991 and they still look as good today as they did when they were first installed.

This project is an excellent example of the durability and longevity of vitreous enamel. The current condition of the enamelled cladding is testiment as to how hard-wearing vitreous enamel is.

The cladding requires very little maintenence making for an extremely cost effective finish.

KEY FEATURES:

- *Longevity*
- *Low maintenance*

A.J WELLS SERVICES:

- *Enamelling*
- *Metal fabrication*
- *Screen-printed graphics*
- *Installation*
